Refined Innovation

Daye Experimental Junior High School

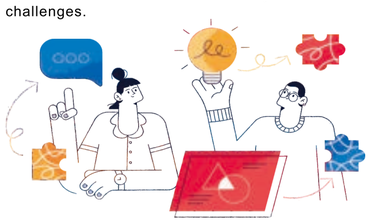
Chiayi City's first public experimental education junior high school. Daye Experimental Junior High School's curriculum aligns with nature's rhythms, dividing the year into four semesters by seasons and incorporating seasonal holidays, camps, and activities.
This approach allows students to learn in harmony with nature, balancing intense periods with relaxation to enhance learning effectiveness.

Science 168 Education Expo

Chiayi City's Science 168 Education Expo, now in its 20th year, aims to strengthen science education and promote scientific literacy through innovative technology programs. Recognized nationwide as a key summer event, the expo offers diverse science activities and outdoor experiments that spark students' curiosity. It encourages the application of technology and digital tools, fostering independent thinking, problem-solving skills, and concepts of environmental sustainability.

Sustainable Academy Exploration Experience Park

Chiayi City has launched the Sustainable Academy Exploration Education Park at Nan-sing Junior High School's Second Campus, the nation's first local government-established exploration experience school. Featuring 32 internationally certified high and low-altitude facilities, this park aims to be Taiwan's leading outdoor exploration education site.
It integrates outdoor education, experiential learning, and sustainability principles into the curriculum, it prepares children with the skills they need for future challenges.



International Perspective

International Education City

Chiayi City fosters educational cooperation and international exchanges by signing MOUs and creating sister schools. It expands its global partnerships by encouraging educational visits and international exchanges among schools. The city also builds internationally-themed campuses, develops local bilingual teaching materials, and creates a bilingual learning environment. This initiative aims to develop global citizens with cross-cultural understanding and position Chiayi City as a leader in international education.

International Wind Band Festival

For over 30 years, Chiayi City has hosted the International Wind Band Festival, evolving from a small southern town into a global hub for wind music. The festival features classical indoor and outdoor concerts, lively wind band parades, and spectacular large-scale marching band performances, creating unforgettable experiences for all attendees.

Jhu-luo Shan International Junior Baseball Tournament

The Jhu-luo Shan International Junior Baseball Tournament has been selected as one of Taiwan's 12 Gold Standard International Sports Events. In 2024, it celebrates its 27th year, attracting sports enthusiasts from both Taiwan and abroad to Chiayi. This event showcases Chiayi City's potential in developing sports tourism.

Chiayi City Night Run

The annual "Chiayi City Night Run," held in August, highlights "Lantan Lake and Renyitan Reservoir," known as Chiayi's green lungs. This event supports the "Sport i Taiwan 2.0 Project" by promoting urban night running, emphasizing family participation. It integrates Chiayi's unique markets with local culture, tourism, ecology, creative industries, and cuisine, fostering sustainable urban innovation. In 2023, the race course received international certification from the Association of International Marathons and Distance Races（AIMS）, making it the only internationally certified trail route in the Chiayi region.

Refined Innovation & International Perspective

Education Navigation at Chiayi+1

Global Vision and Sustainable Education

Chiayi City, though small,
is vibrant and dedicated to education with
visions of humanity, technology,
innovation, and global perspective.
We focus on well-being, lifelong learning,
and self-realization, integrating innovation and
sustainability to foster student growth.
Our goal is to spark curiosity and
a sense of responsibility in students,
shaping them into individuals who will
make a positive impact on the future.

CHIAYI CITY
Small City Big Change

Humanity-Oriented

SDGs Education Guidelines

Chiayi City is the first in the nation to launch the "Chiayi City Education Guidelines for Practicing the United Nations Sustainable Development Goals（SDGs）." This initiative incorporates the SDGs into the curriculum, helping teachers and students systematically advance and practice these goals.

Reading Excellence Award

Chiayi City values promoting reading culture.
To ensure that every student can immerse themselves in reading and develop lifelong habits, the city government has upgraded book collections, promoted reading education through professional teachers, and established community reading stations in schools. These efforts have earned the Ministry of Education's Reading Excellence Award for several years in a row.

Inclusive Education

Chiayi City promotes adaptive and inclusive physical education through "inclusive participation," encouraging special education students and their peers to engage in sports together. This approach lets special education students enjoy sports while teaching regular students to embrace and respect differences, fostering mutual inclusion and benefits.

Young Children's Sports Day

By cultivating the habit of exercising from an early age, children develop strong and healthy bodies, fostering a lifelong love for physical activities. Through competitions, children learn teamwork, humility in victory, and grace in defeat. This nurtures "sportsmanship" and enhances the future competitiveness of Chiayi City.

Technology-Assisted

Jia e-Card

Chiayi City has rolled out smart campus services with the Jia e-Card, a digital student card. It lets students check in for attendance, use self-checkout at the library, and book health center appointments independently. Integrated with a school app, the Jia e-Card also provides real-time updates for parents and teachers to track student activities.

Digital Learning Awards in Four Major Categories

Chiayi City has been promoting digital learning by expanding hardware facilities, creating digital learning environments, and developing teachers' digital teaching skills. These efforts significantly enhance students' learning outcomes. The city has received four major awards: the Leading eLearning Education Office Award, the Outstanding School Award, the Leading Personnel Award, and the National Lesson Plan Excellence Award.

Maker & Tech Centers

Three Maker & Tech Centers have been set up at Pei Shin, Lan Tan, and Yu Shan Junior High Schools, partnering with core elementary schools Giao Ping, Lan Tan, and Gang Ping. These centers integrate technology education across schools to boost students' problem-solving skills and creativity through hands-on experiences.
